

You are cordially invited to attend GI Surgical Rounds:

Updates in Targeted Therapy in Metastatic Colorectal Cancer - Implications for Curative Resection in Patients with Hepatic Colorectal Metastases

Presented By: Prof. Dr. med. Dirk Arnold, MD
Tumor Biology Institute -
Klinik für Tumorbiologie
Department of Medical Oncology
Freiburg, Germany

Date: Tuesday December 2, 2014

Time: 7:00 AM – 8:00 AM (breakfast provided)

Location: Vancouver General Hospital, Jim Pattison Pavilion
1st floor, Taylor Fiddler Room

Learning Objectives:

- 1) Describe notable first line biologic choice of therapy data in mCRC.
- 2) Incorporate recent mCRC clinical trial data for targeted therapies into continuum of care decisions
- 3) Reflect on international perspective towards advances in mCRC therapy and implications for multidisciplinary teams.

RSVP: zahra.ramji@roche.com

Prof. Arnold is a specialist in Hematology Oncology and Palliative Care, and currently Director of the Tumor Biology Institute Freiburg. From 2010 to 2013 he was Medical Director of the University Cancer Center Hamburg, and held positions at the Universities of Halle-Wittenberg and Berlin.

His major focus in clinical and translational cancer research is the development of modern treatment strategies for gastrointestinal cancers with the integration of novel drugs.

Another focus of his work is optimizing treatment structures for patients with malignancies, in large scale networks for research and cancer care.

Prof. Arnold is a member of numerous national and international societies, e.g. ASCO, ESMO (where he chairs Clinical Guidelines Committee), EORTC, NCI, CR UK, and has published more than 80 peer-reviewed manuscripts.

This activity was made possible through support provided by Hoffmann-La Roche Limited.
