# Research Day Schedule

- 0830**      **WELCOME – Dr. Stephen Chung**
- 835**        **Updates on Transplant Research Foundation Venture Grant Funded Projects**  
              **Dr. Megan Levings**  
              *Designer T cells to control the immune system*  
              **Dr. Caigan Du**  
              *Improved organ preservation solutions*
- 0925**      **Rising stars presentations**  
              **Dr. Nina Quiskamp**  
              *Stem cell derived insulin producing cells to reverse diabetes*  
              **Karen Chan**  
              *Biomarkers Monitoring for acute graft rejection*  
              **Kevin Rey**  
              *Your gut microbiome can help you retain your graft*
- 1010**      **Refreshment break**
- 1025**      **Dr. Laine Ross**  
              *When altruism goes awry: Living Kidney Donors who Develop End Stage Renal Disease*
- 1115**      **Dr. Claudia Chavez-Munoz,**  
              *New era of transplantation: Organ scaffolds and 3D bio-printing*
- 1200**      **Lunch, posters and networking**
